Portfolio

Profile

Final-year AI & Big Data engineering student with hands-on experience building production-grade Generative AI, NLP and machine-learning solutions – from a live Forex prediction platform deployed on a banking trading floor to LLM-driven automation tools. Comfortable turning raw data into predictive models, dashboards and business-ready insights for cross-functional stakeholders.

Education

ISGA — **Rabat**
Engineering Degree in Artificial Intelligence & Big Data — *2021 – 2026*

Lycée Moulay Youssef — **Rabat**
Baccalaureate, Physical Sciences — *2020 – 2021*

Professional Experience

Attijariwafa Bank — **Casablanca**
Data Scientist / AI Engineer Intern — *Feb. – Aug. 2026*

- Built an end-to-end AI decision-support platform for Forex traders, including a FinBERT-powered NLP pipeline that scrapes and scores 30+ live RSS sources, cutting manual news-analysis time by an estimated 70%.
- Designed, trained and calibrated LightGBM classification models (UP/DOWN/FLAT) from scratch on 18 years of market data (2002–2020), using 10+ technical indicators (Fibonacci, EMA, Bollinger Bands, Ichimoku) with automated retraining every 12 hours to preserve predictive accuracy.
- Architected a production three-tier system (React/TypeScript dashboard, Spring Boot REST layer, Flask/Python ML inference service), deployed live on an international trading floor for real Forex operations.

McLeuker — **Paris, France**
AI Engineer Intern — *Sept. 2025 – Jan. 2026*

- Developed and optimised supervised ML models and LLM-based pipelines for product recommendation, customer scoring and predictive analytics on large-scale, multi-dimensional datasets, improving performance through iterative feature engineering.
- Delivered EDA and data-visualisation dashboards that surfaced actionable insights, directly supporting data-driven business decisions across multiple product verticals.

Works Platform / Caciopee — **Rabat**
AI Developer Intern — *June – Aug. 2025*

- Built **AUTOM** from the ground up – a generative AI tool that transforms structured XML business data into interactive UI mockups via LLMs, cutting prototyping time for product teams by automating design generation end-to-end.
- Engineered a structured data-extraction pipeline (JSON/XML parsing) and integrated LLM prompt-engineering workflows to produce context-aware, reusable UI design recommendations at scale.

POL IT — **Casablanca**
Web Development Intern — *Sept. – Oct. 2024*

POL IT — **Casablanca**
Observer Intern — *Aug. – Sept. 2023*

Projects

Attijariwafa Bank
R60 – Forex Scraping & Prediction System — *2026*
Automated FinBERT + LightGBM Forex intelligence pipeline with a real-time React dashboard – see Professional Experience for details.

Personal Project
Texara – Offline-First LaTeX IDE — *2025–2026*
Browser-based LaTeX IDE with offline-first TeX Live compilation, real-time collaborative editing (Yjs/WebRTC), a custom CodeMirror 6 mode with live KaTeX previews, native Git/GitHub integration, and multi-format export (PDF, Word, HTML) – matching Overleaf's output across 50+ packages.
Stack: React · TypeScript · Vite · CodeMirror 6 · Node.js · TeX Live · Yjs · isomorphic-git

Works Platform
AUTOM – Automockup AI — *2025*
LLM-driven system turning structured XML business data into interactive UI mockups – see Professional Experience for details.

POL IT
Jortal – AI Employment Platform — *2025*
Laravel recruitment platform using NLP for semantic CV-to-job-offer matching – see Professional Experience for details.

Technical Skills

Languages: Python · Java · TypeScript · JavaScript · PHP · SQL · C/C++ · Bash · Kotlin · HTML/CSS · LaTeX
AI / ML: LightGBM · XGBoost · FinBERT · Transformers · NLP · LLMs (Mistral, DeepSeek, CodeLlama, GPT-4) · scikit-learn · TensorFlow · Keras · PyTorch · Pandas · NumPy · FAISS · RAG · LangChain
Generative AI: Prompt Engineering · Fine-tuning (LoRA/QLoRA) · Embeddings · Vector DBs (Pinecone, ChromaDB) · OpenAI API · Anthropic API · Hugging Face
Data & BI: PostgreSQL · MongoDB · Redis · SQL · NoSQL · Power BI · Tableau · Grafana · Jupyter · EDA · Data Cleaning · ETL · Apache Kafka · Spark (basics)
Web & API: Spring Boot · React.js · Flask · FastAPI · Laravel · Symfony · REST API · GraphQL · WebRTC · WebSockets · Docker · Kubernetes · Git/GitLab · CI/CD (GitHub Actions)
Cloud & DevOps: Oracle Cloud Infrastructure (OCI) · AWS (EC2, S3) · Linux · Nginx · Terraform (basics) · MLflow · Weights & Biases
Methods: Supervised/Unsupervised ML · Deep Learning · Feature Engineering · Agile/Scrum · Design Patterns · TDD · SOLID

Languages

French: Fluent (TCF C2) **English**: Fluent (TOEFL B2) **Arabic**: Native
